

Full-Stack Software Engineer

England, GB | 07427673621 | ollanmuza@gmail.com | www.ollanmuza.com | GitHub: github.com/kxngollan

PROFESSIONAL SUMMARY

Results-driven full-stack engineer with 3+ years of experience architecting and shipping production systems used by 70,000+ users. Proven ability to deliver measurable business impact: 30% performance gains, 45% cost reductions, and £5,200/month in operational efficiency. Expert in designing scalable microservices, optimising databases, and leading complex migrations. Track record of converting technical requirements into elegant solutions that drive user engagement and business growth.

TECHNICAL SKILLS

Core Languages: JavaScript, TypeScript, Python, Java, C#

Frontend: React, React Native, Vue.js, Next.js, Nuxt.js, HTML/CSS, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, Django, .NET, Spring Boot, GraphQL

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB

Cloud & DevOps: AWS, Azure, Google Cloud, Docker, Kubernetes, CI/CD pipelines, Git

Architecture: REST APIs, Microservices, System Design, Real-time Processing, WebSocket

EDUCATION

University of Leicester - BSc Mathematics

UPS College, Grays - A Level: Maths (A), Further Maths (A), Computer Science (A)*

PROFESSIONAL EXPERIENCE

Full-Stack Engineer | PepsiCo, Leicester

January 2025 – December 2025

- Built mission-critical internal applications from ground zero, transforming manual workflows and recovering 200+ hours/month (£5,200/month value) for 50+ electrical engineers across the organisation
- Designed and deployed NoSQL database architecture that improved query consistency by 25%, eliminated data redundancy, and enabled real-time reporting
- Executed seamless SQL-to-NoSQL migration with zero downtime, accelerating application throughput by 30% and improving user experience for 500+ internal users
- Mentored junior developers on microservices architecture and modern DevOps practices
- Tech Stack: React, TypeScript, Node.js, MongoDB, AWS, Docker

Full-Stack Engineer | Toru Digital, Northampton

August 2024 – December 2024

- Built and shipped automated testing framework covering 40+ backend services, reducing production defects by 16.7% and cutting debugging time by 8 hours/week
- Owned full lifecycle delivery of 6+ features across 3 products, from requirements gathering through production monitoring

- Designed CI/CD pipeline optimisation reducing deployment time from 20 to 8 minutes, enabling 15+ weekly releases
- Drove cross-team collaboration with product and QA, achieving 99.2% on-time feature delivery
- Tech Stack: Python, FastAPI, PostgreSQL, Docker, GitLab CI, REST APIs

Full-Stack Engineer | A Side of Code, London

May 2023 – July 2024

- Architected and deployed seamless UI-to-backend integration for 5 client projects, driving 20% increase in user engagement and 10% boost in retention rates
- Refactored legacy codebase applying SOLID principles and DRY methodology, reducing bundle size by 12% and cutting load time by 3.2 seconds
- Optimised N+1 queries and implemented caching strategies, improving API response times by 40% across all services
- Established testing best practices and code review standards, improving code quality metrics by 35%
- Tech Stack: Vue.js, Nuxt.js, Express.js, PostgreSQL, MySQL, REST APIs, Redis

PROJECTS & IMPACT

Watch Netflix Together - Real-time Streaming Synchronisation Platform

<https://watchnetflixtogether.com/> | 70,000+ Active Users

- Architected and deployed a real-time media synchronisation engine enabling users to watch Netflix together simultaneously with sub-1 second latency
- Engineered robust WebSocket infrastructure handling 5,000+ concurrent connections with 99.8% uptime
- Reduced infrastructure costs by 45% through intelligent code optimisation and API gateway architecture, saving \$15K+ annually
- Implemented video stream sync algorithm achieving <200ms user-to-user latency across global regions
- Tech Stack: Node.js, WebSocket, AWS (EC2, CloudFront), MongoDB, Real-time event processing

CERTIFICATIONS & CREDENTIALS

Microsoft Certified: GitHub Foundations (2024), GitHub Copilot (2024), Azure SQL Server (2025)

AWS Certified: Cloud Practitioner Foundational (2024)

KEY METRICS & ACHIEVEMENTS

- ✓ 70,000+ users on production systems built and being maintained
- ✓ 30% average performance improvement across applications
- ✓ 45% cost reduction through optimisation and architecture improvements
- ✓ 99.2% on-time delivery rate on projects
- ✓ 16.7% reduction in production defects through testing frameworks
